filler masterbatch

Coraplast Filler Masterbatches are high concentrates of Micronised Coated $CaCo_3$ & Talc in PE & PP polymer carriers.

Our Fillers are recommended for applications in Raffia & FIBC, Lamination, Blown Film, Injection & Blow Moulding

Performance Characteristics:

- Excellent Anti-Fibrillation
- Reduces Cost
- Enhance Anti-Slip property
- Improves Stiffness

Customer Service

Being a customer driven company, we have always been proactive to customer's needs, for new product development, application support, product economy or regulatory aspects.

Our technical services team, with help of the latest lab-scale pilot plants translates new products to competent solutions by simulating conditions of applications in our labs.

Meeting a customer's Colour requirement is crucial, more than developing a right colour, it's also important to provide them with cost-effective solutions. We create 100 new shades every week and have already developed more than 20,000 shades.

Coraplast Industries

Established in the year 2000, Coraplast Industries is one of the leading players in Plastics and Fiber grade Masterbaches with two production and R&D facilities located in India & Turkey.

Coraplast Industries have invested in the most advanced and modern manufacturing technology from the leading global companies.

With current Masterbatch production capacity exceeding 125,000 MT annually, we deploy best manufacturing practices and have integrated all process-related machines to systems which capture real-time process parameters for better operation control, improvement in productivity and enhance reproducibility.

We have expanded our presence through our growing number of sales offices across India and Globally.
